

Bobrick Product Comparison Sheet

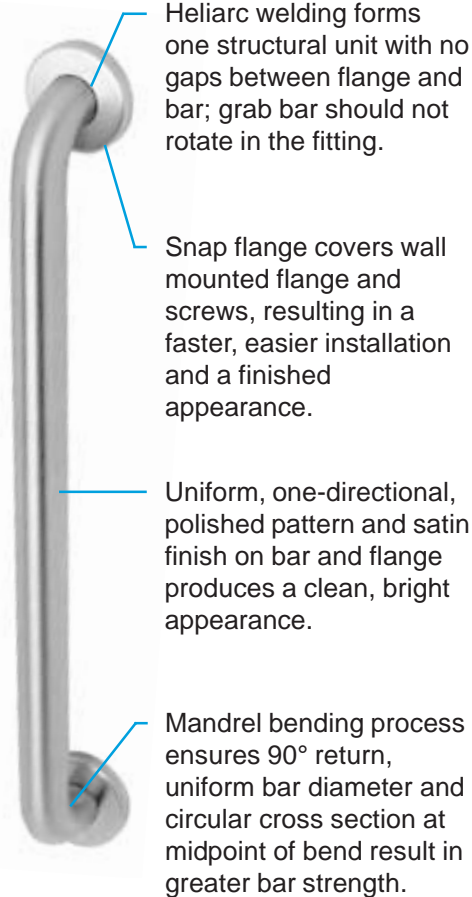

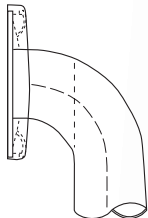

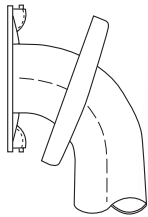

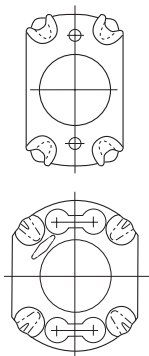

Grab Bars

Efficient and Compliant

Bobrick's commitment to ADAAG code compliance, partnered with superior manufacturing, produces a variety of grab bar designs to meet Barrier-Free Guidelines and Building Code requirements.

FAST FACTS

Best Value B-6806

Heliarc welding forms one structural unit with no gaps between flange and bar; grab bar should not rotate in the fitting.

Snap flange covers wall mounted flange and screws, resulting in a faster, easier installation and a finished appearance.

Uniform, one-directional, polished pattern and satin finish on bar and flange produces a clean, bright appearance.

Mandrel bending process ensures 90° return, uniform bar diameter and circular cross section at midpoint of bend result in greater bar strength.

Why Bobrick Grab Bars?

- **The structural strength of all grab bars and their mounting devices comply with Barrier-Free Accessibility Guidelines (See Bobrick's Technical Data Sheets for proper mounting instructions).**
- **Bobrick offers peened, non-slip gripping surfaces for added safety.**
- **Wingit™ Grab Bar Fastening System secures all Bobrick Grab Bars. This fastening system permits installation of grab bars without backing in new construction and eliminates need to open and reconstruct walls for renovation.**
- **2-day QuickShip for most models.**

Value Added Features:

- ADA Compliance** Refer to the Barrier-Free Washroom Planning Guide (Form No. BFPG-03) and Bobrick's Technical Data sheets for mounting, placement, and operation guidelines. All building plans should be confirmed with local jurisdictions to ensure job compliance.
- Warranty** One year warranty on all Bobrick Washroom Accessories.

Cleaning/Maintenance Tips:

1. Clean equipment operates better, lasts longer, and requires less maintenance.
2. Polish with the grain of satin finish.
3. Remove residue of any cleaning product with water and wipe dry with clean cloth or paper.
4. Please refer to Technical Bulletin 21 for further stainless steel cleaning instructions.
5. Please refer to Technical Bulletin 76 for further Matrix Series cleaning instructions.
