### Cleaning/Maintenance Tips:

**WARNING: BEFORE REMOVING COVER, TURN ELECTRICAL POWER SUPPLY OFF FOR ANY MAINTENANCE OR SERVICE TO DRYER. DRYER MUST NOT BE OPERATED WITHOUT THE COVER.**

1. Exterior of cover should be cleaned with a damp cloth to remove dust and surface dirt. Do not use abrasive agents or solvents as they may permanently damage surface of cover.
2. At least once every 6-12 months remove cover. Using a small brush or vacuum, clean out buildup of dust and lint from air intake grille and baffle. NOTE: If dryer is installed where there is a lot of dust and dirt in the air, the interior of the dryer should be cleaned more frequently.
