Bobrick Introduces Automatic Universal Roll Paper Towel Dispensers.

October 1, 2009 - North Hollywood, CA – Bobrick Washroom Equipment, Inc. announced the introduction of their roll paper towel dispensers featuring non-proprietary, automatic universal roll towel dispensing, saving as much as 30% or more compared to proprietary roll towel purchasing agreements. Available in five models: B-2974 surface-mounted, B-29744 semi-recessed, 3974-50 field changeable module for Bobrick's recessed Convertible Towel and Waste Series, B-3974 recessed towel and waste unit, and the B-3979 surface-mounted towel and waste unit with 4" deep skirt.

Units dispense universal, 1-1/2" to 2" diameter core, up to 8" diameter, 8" wide, non-perforated, non-proprietary rolls, eliminating proprietary purchase agreements. Savings are achieved by allowing the flexibility to purchase economical universal roll paper towels from open-market janitorial supply and paper distribution channels.

Additional features: automatic, touch-free dispensing reduces risk of cross contamination; extended 300,000 cycle, 1-year battery life; available AC adapter and 50%-70% recycled stainless steel fabrication.

Paper savings: adjustable towel lengths and time delays, shorter lengths on second activation, and stub roll dispensing; complies with the US EPA Reduce & Reuse Resource Conservation Initiative.

For more information, visit www.bobrick.com or telephone 800.553.1600.
