

## **NEW BOBRICK LEVERLESS, ADA COMPLIANT ROLL TOWEL DISPENSER/ WASTE RECEPTACLE.**

August 12, 2005 — North Hollywood, CA — Bobrick Washroom Equipment, Inc. announced the availability of its new type-304 satin-finish stainless steel B-3961 (recessed mounted) and B-39619 (surface mounted) Roll-Paper Towel Dispenser/Waste Receptacle units. Leverless pull-towel dispensing prevents cross-contamination in hygiene-sensitive environments. ADA Accessibility Guideline compliance for forward and side reach is achieved by mounting unit with towel opening and feed wheel within 48" maximum height above floor, and less than five pounds of force operation.

Units dispense 12" lengths of economical, non-perforated, universal roll paper towels; mechanism operates smoothly and quietly. Both models accommodate standard core rolls 8" wide, plus a 3.5" stub roll with automatic transfer; view slots facilitate changeovers.

For more information, please contact Bobrick at 800/553-1600 or visit [www.bobrick.com](http://www.bobrick.com).
