## **BOBRICK ANNOUNCES NEW TOILET PARTITION CATALOG.**

June 15, 2007 -- North Hollywood, CA -- Bobrick Washroom Equipment, Inc. has published the Company's new Toilet Partition Catalog providing new information for building owners, architects and specifiers. Building occupancy needs have been identified for restrooms in three property categories: Prestige Buildings, Standard Use Buildings and Heavy Traffic Buildings. In turn, toilet partition series including Solid Color Reinforced Composite (SCRC), Solid Phenolic and Plastic Laminate, and their respective hardware options including standard concealed stainless steel and optional full-height stainless steel hardware are recommended for each property category in terms of design, durability and price. Additionally, three performance comparisons are presented based on independent ASTM testing: Standard Untreated HDPE vs. SCRC and Solid Phenolic, and Powder-Coated Metal vs. Plastic Laminate. Tests are for Graffiti, Impact and Scratch Resistance, and Surface Burning Characteristics including Flame Spread and Smoke Development, along with their respective ASTM E84 test Interior Wall and Ceiling Finish Classification, A, B or C.
