OPERATION:

Unit is equipped with a self-closing panel covering each disposal opening. Napkin disposal is emptied by opening door with furnished key and removing waste receptacle.

INSTALLATION:

Mounts in toilet partition 1/2" to 1-1/4" (13 x 32mm) thick, centered through a cutout specially ordered from partition manufacturer or field cut. Dimensions of cutout are to be 11" wide x 15-1/2" high (280 x 395mm). For factory-made cutouts, location and size details should be furnished to partition manufacturer. For hollow-core metal partitions, solid framing into which mounting sheet-metal screws can be secured is required.

For installation with sheet-metal screws furnished, place unit firmly in partition opening, making sure the entire perimeter of fixed flange is tight against partition surface, then secure to partition with sheet-metal screws furnished, through four holes in fixed flange at points indicated by an S. On other side of partition, position adjustable flange so the mounting screw holes are not inline with mounting screw holes in fixed flange. Make sure the entire perimeter of adjustable flange is tight against partition surface, then secure with sheet-metal screws furnished.

Designer's Note: Cutouts in Bobrick toilet partitions can be pre-cut for Bobrick partition-mounted accessories at factory if location and size of cutouts are specified and the order for both partitions and accessories are received together.
