**MATERIALS:**

**Grab Bar** — 18-8, Type-304, 1.2mm (18-gauge) stainless steel tubing with satin finish. 32mm (1-1/4") outside diameter. Ends are heliarc welded to concealed mounting flanges. Clearance between the grab bar and wall is 57mm (2-1/4").

**Concealed Mounting Flanges** — 18-8, Type-304, 3mm (1/8") thick, stainless steel plate; end flanges 80mm (3-1/8") diameter with 5 holes for attachment to wall.

**Snap Flange Covers** — 18-8, Type-304, 0.8mm (22-gauge) drawn stainless steel with satin finish. 79mm (3-3/16") diameter x 14mm (9/16") deep. Each cover snaps over mounting flange to conceal mounting screws.

**STRENGTH:**

Grab bar configurations can support loads in excess of 113kg (1108N) if properly installed, complying with accessibility guidelines (including AS 1428.1-2001) for structural strength.

**Safety Warning:** Grab bars are no stronger than the anchors and walls to which they are attached and, therefore, must be firmly secured in order to support the loads for which they are intended. To avoid potential injury, the building owner or maintenance personnel should remove the grab bar from service if the grab bar is not adequately secured to wall or if there is any observed damage to the welds.

**INSTALLATION:**

Provide concealed anchor device or backing as specified or required in accordance with local building codes before wall is finished. Fasten concealed mounting flanges to anchor device or backing with two screws in each flange. Snap flange covers over each mounting flange to conceal mounting screws. Concealed anchor devices and mounting screws are not included with Bobrick grab bars and must be specified as an accessory.
