Project: Apple Store on Al Maryah Island

Elevated Restroom Design Revitalizes Abu Dhabi Apple Store

Opened in 2015, the Apple Store on Al Maryah Island stands out as a bustling and lively retail hub, drawing more than 30 million visitors since its opening. This dynamic shop creates an inviting atmosphere and a gathering place where customers can explore, engage and experience the Apple brand in an energetic environment.

Apple is well-known for its exceptional design aesthetic, quality craftsmanship and meticulous attention to detail. The design of Apple Al Maryah Island resulted from a close collaboration between several design teams to ensure that the space reflects Apple's commitment to innovation and user experience. In alignment with these design goals and values, Foster + Partners aimed to create a building that embodies these characteristics and selected several Bobrick-branded industry-leading restroom accessories to enhance the store's public restroom.

The Core of Timeless Design

Visitors approaching the store are greeted by a striking mirrored stainless-steel portal with elegant water jets cascading gracefully over the exterior glass walls surrounding the entrance. Foster + Partners maintained the stainless-steel theme by selecting Thrislington's Flow stainless steel cubicles featuring an anti-fingerprint finish. The stainless-steel surface reflects the building's architecture and is designed for durability. Flow doors close smoothly using a hydraulic system, ensuring a gentle, flush finish without slamming.

The design team also chose Bobrick's B-3942 semi-recessed paper towel dispenser/waste receptacle and the B-635 Klutch mobile device holder to complement the Flow cubicles. Both products feature a brushed stainless-steel finish that elevates and unifies the restroom design while

ELEGANT CUBICLE SYSTEM

Flow stainless steel cubicles are a floor-to-ceiling system that incorporates hinge-less doors on a pivoting system that ensures the doors stay closed.

Featured Project: Apple Store on Al Maryah Island

Flow stainless-steel cubicles at the Al Maryah Island, Abu Dhabi Apple store.

The B-3942 semi-recessed paper towel dispenser/waste receptacle features a sizeable 12-gallon receptacle for easy disposal of used paper towels.

The B-635 Klutch stainless steel mobile device holder has won multiple innovation awards.

Koala Kare baby changing stations provide caregivers with a safe, sanitary space to change their child.

helping to create a clean and hygienic environment. Designed with robust engineering principles and made from premium stainless steel, these accessories provide unmatched quality and durability, ensuring they stand the test of time.

The semi-recessed paper towel dispenser/waste receptacle unit features a folded paper towel module and a 12-gallon waste container for easy disposal of used paper towels. The innovative Klutch device holder features a patented pivoting cradle that safely keeps phones, tablets and laptops away from wet or unsanitary surfaces in restrooms, which was critical for Apple store customers.

Foster + Partners also incorporated a Koala Kare baby changing station to support caregivers and their children. Showcasing a uniform-grain stainless steel exterior, the unit adds a clean, contemporary touch to the space and enhances child safety by providing a secure, clean surface for diaper changing. The polypropylene changing surface is made with exclusive Microban® antimicrobial product protection, effectively minimizing odor-causing bacteria between cleanings and promoting a hygienic, fresher environment.

The Apple Store on Al Maryah Island skillfully incorporates modern, sleek, stainless-steel features such as cubicles, paper towel dispensers, mobile device holders and baby changing stations. These accessories enhance the restroom's aesthetic appeal, creating a unique and friendly experience that aligns with and reflects Apple's brand philosophy.
