***Architectural Record* Honors Bobrick's New Automatic Top-Fill Soap Dispensers as a Best Architectural Product of 2024**

NORTH HOLLYWOOD, CA, December 16, 2024 – Bobrick Washroom Equipment, Inc., a prominent leader in the global washroom accessories market, is excited to share that its new automatic top-fill soap dispensers, featured in the esteemed Fino Collection, have been honored by *Architectural Record* as one of the Best Architectural Products of 2024.

Architectural Record's prestigious Best of Products competition showcases the top building materials and furnishings introduced to the North American market over the past year. A panel of architects and designers evaluates the entries based on criteria such as innovation, functionality, sustainability and aesthetics.

Bobrick has introduced the **Fino Collection** of automatic soap dispensers, which combines style and practicality. Each dispenser features top-fill functionality, allowing for easy refilling while maintaining a sleek appearance that enhances any environment. The dispensers come in five appealing finishes: **polished chrome, polished graphite, brushed brass, brushed nickel**, and **matte black**. The Fino Collection also offers matching faucets, enabling a cohesive and sophisticated look. Additional product highlights include:

- Top-fill reservoir: easy and mess-free refilling from above the counter, saving up to 25% on labor costs
- Cost efficient: compatible with bulk liquid or foam soaps, achieving 80% or more savings
- Two distinctive designs: a contemporary cylindrical shape and a streamlined modern option
- Touchless operation: the adjustable soap control dial and a hidden sensor reduce the risk of cross-contamination
- Time to refill: a low soap LED indicator that flashes when the soap level reaches approximately 25% of its capacity
- ADA-compliant: accessible for all users
