TOWELMATE™ AND LINERMATE™ ACCESSORY NOW STANDARD ON BOBRICK CONTURASERIES® RESTROOM ACCESSORIES.

June 25, 2010 – North Hollywood, CA – Bobrick Washroom Equipment, Inc. announced the addition of TowelMate dispenser retainers and LinerMate liner holders on all ConturaSeries manufactured after June, 2010; also available as accessories for earlier models.

TowelMate accessory dispenses one towel at a time resulting in a reduction of paper towel usage by more than 20%, eliminating multiple towel dispensing, and towels falling to the floor. Additional savings can be achieved by changing from C-fold to more economical Multifold paper towels; design also prevents towels from falling forward when the door is open for refilling.

LinerMate accessory eliminates unsightly liner bag overhang for improved restroom appearance, ending the custodial habit of draping liners over the top of waste receptacles. Also eliminates the use of problematic hooks, prevents misdirected trash around and behind liner, and facilitates the easy replacement of filled liners without unlocking the waste receptacle.
